So many celebrities are into rich, deep, eyeliners and bold lashes, it may make you wonder how they get that streamlined, yet smoky effect. One product that can help is Xtreme Lashes GlideLiner Eye Pencil. This is no ordinary eye pencil! Xtreme Lashes is safe for use with eyelash extensions (like those Megan Fox and other celebrities wear).

The best part is the seductively smudgy lines and vibrant shades that Xtreme Lashes offer! **Xtreme Lashes GlideLiner Eye Pencils** are made with a gel technology to give you the definition and look of a liquid liner with the ease of an eyeliner pencil. The result is a resilient, water resistant finish that is mineral oil free and enriched with Vitamin E. These pencils feel so nice going on, no tugging or flaking at all. My lids are generally better off with my MAC Fluidline, but if I'm in the mood for a smudgy pencil look, this is the one!

GlideLiners come in Xtreme Black, Midnight Blue, Xpresso, Golden Olive, and Plum.

What do you think? Do you have or want eyelash extensions?
