GlideLine your eyes

If you're a **Pretty** that has extra long eye lashes, eyelash extensions, or wears falsies then you should start considering products from **Xtreme Lashes**. They make the first and only eyeliner for eyelash extensions.

Naturally my lashes are longer than most, so I find that certain eyeliners can crud and not stay put where/when I need them too. However, I was amazed at how easy GlideLiner goes on. It's super fast and you hardly need to press the liner against your lids. Other brands may have you pressing firmly, but that's not good or safe for the eyes. GlideLiner only goes where you tell it.

It comes in five colors:
Xtreme Black, Golden Olive,
Plum, Xpresso, and
Midnight Blue. So your eyes
can match your mood!

Xtreme Lashes also makes the wonderful **Wishful Blinking EyeShine** that we're **giving away**, so hurry up and enter our contest (ends March 9)!
