

Illuminate Your Eyes With Wishful Blinking

April 4, 2009 by [Beth Bender](#)

CHECK *it* OUT

Looking for a way to add some *bling-bling* to your eyes without looking like a disco ball? Oh no we can't have that! Then you need to check out **Wishful Blinking Eye Shine**, **Xtreme Lashes** from *Jo Mouselli*. A little dab with the wand along your eyelids will do you good! Just the slightest hint of iridescent flecks that you can wear on the cheekbones as well if you so dare.

Wishful Blinking Eye Shine comes in 5 pretty shades including: **Arabian Night** (black), **Diamond Dust** (silver), **Golden Oasis** (gold), **Iridescent Mirage** (soft pink), and **Sahara Sand** (Copper). **Wishful Blinking Eye Shine** is a 4 in 1 product.

All of these colors can be used as a **shadow**, **eyeliner**, **highlighter**, and a **blush**. Although I don't know if I would do the blush thing, but the eyelids for us gals who are all about aging fabulously look nice and give the eyes an instant twinkle. If you do decide to go for the cheeks or browbone, make sure to blend well to avoid clusters of color and sparkle. Something nice about these Eye Shines is the soothing *Calendula & Chamomile* extracts which cool and calm the eye area, and also help in the easy removal of these glamorous shadows.

The suggested retail price for Wishful Blinking Eye Shine is \$20.00. For more info, to purchase, and to see all of the colors available you can visit their site at [Xtreme Lashes](#).

xx
