

半永久性睫毛假体：Xtreme Lashes™

2007年9月12日 |

Forget mascaras, fake lashes or the painful eyelash transplants to make the eyes lashes look longer. Now there is a semi-permanent eyelash in the market. Xtreme Lashes can be stuck to the natural lashes with medical grade adhesive to give a look of fullness to the lashes. It is safe and lasts for a long time provided one takes proper care. Before

After

Product Highlights

- These are synthetic semi-permanent eye lashes.
- These come in small pots and are separated by color and length.
- They come in colors like black, brown, blue and purple.
- Their lengths are from 7 millimeters to 15 millimeters.
- A session to fix on these lashes take about two hours.
- Eyes have to remain closed throughout the session.
- These are attached to the natural lashes with adhesives.
- It is safe and gives a natural look.
- The cost of the service to implant Xtreme lashes is approximately \$200.
- The lashes last upto 8 weeks.

Tips to makes Lashes last longer

- Don't rub your eyes while these lashes are on.
- Try not to use too many cosmetic products on them.
- Avoid waterproof mascara and oil-based products like make-up remover or moisturizers.
- Use heated eye lash curlers instead of traditional ones.
