

## HOW TO INCORPORATE FAUX MINK X-WRAP™ LASHES INTO YOUR APPLICATIONS

Use Faux Mink X-Wrap™ eyelash extensions exclusively to create a high-impact look for clients who desire a very dramatic result. By incorporating Faux Mink or Faux Mink Bold™ eyelash extensions throughout the X-Wrap design, you can add subtle softness for clients who prefer a more natural look. Faux Mink X-Wrap eyelash extensions help conceal gaps in a sparse lash line and provide a bold, voluminous lash look without compromising the health of your client's natural eyelashes.

For a finished look and increased longevity, incorporate 0.07 mm and 0.05 mm Faux Mink Bold eyelash extensions on the inner and outer corner eyelashes that are thinner and more delicate.

The Volumation™ technique can also be used to achieve 3-dimensional volume. To incorporate Volumation into your lash application design, utilize the Stacking technique with X-Wrap lashes. Multi-Lash pickup is not possible with the X-Wrap lash due to its rectangular shape. Utilize the Multi-Lash Pickup technique with Faux Mink or Faux Mink Bold eyelash extensions.

Always conduct a full client consultation and reference the Lash Calculator™ tool to ensure a safe, long-lasting, beautiful application for your client.

Please refer to the Faux Mink X-Wrap Product Fact Sheet for additional lash application, attachment and placement techniques that can be utilized.
